PROJECTS

SwiftBuy || *Nextjs*

- SwiftBuy, powered by Next.js, offers lightning-fast e-commerce experiences.
- Efficient routing and dynamic rendering ensure swift product exploration.
- Enhanced with OAuth authentication using NextAuth.js for secure and convenient user login.
- Leveraging MongoDB, SwiftBuy implements all CRUD operations for efficient data management.

SocialSync|| *Mern*

- SocialSync, built with the MERN stack and Socket.IO, delivers seamless social media experiences.
- Implements infinite scrolling for posts, providing users with a continuous feed of content for an enhanced browsing experience.
- Enhanced with OAuth authentication using NextAuth.js for secure and convenient user login.
- Features stories functionality, allowing users to share temporary updates in a visually engaging format.

YumYum|| *Mern* || *React Native*

- SocialSync, built with the MERN stack for the web and React native for mobile.
- Administrators have full control over the menu, making it easy to add, remove, or update food items.
- With integrated Stripe payment, enjoy peace of mind with safe and efficient transactions.
